The Environment Shipping

Goal: Reduce carbon footprint of shipping services between Iceland, the Faroe Islands and Europe by 30% in five years. Reported to FESTA.

2021

48.2

CO₂ per ton/km

2022

47.9

CO₂ per ton/km

Road > focus CNG/LNG short term > focus hydrogen long term

2025

43.8

CO₂ per ton/kr

The carbon footprint of goods in domestic transport.

Ine Environment

Samskip has established goals to decrease emission of greenhouse gases and minimize environmental impact.

Domestic transport

Samskip's target regarding reduction of CO_2 emission in road transportation in Iceland is 6.0 - 10.5% by the end of 2025.

The higher target is dependent on the availability of hydrogen trucks and infrastructure in Iceland in the latter half of the period. We report those goals to FESTA yearly.

Saman náum við árangri

99% fewer plastic cups

The use of plastic cups was successfully reduced.

Printing of waybills on paper was abandoned.

All waste classified

Increased classification of all waste at Samskip's sites.

Reduced

food waste

All canteen portions are weighed.

Corporate social responsibility

EcoVadis

We joined **EcoVadis** in 2020 and got the **silver medal**.

What is EcoVadis?

EcoVadis helps companies to manage our network both upstream and downstream, either by sharing your performance with your stakeholders or monitoring the performance of your own upstream value chain. Tens of thousands of companies partner with EcoVadis to collaborate on sustainability with a common platform, universal scorecard, benchmarks and performance improvement tools.

Corporate social responsibility

Carbon footprint calculations

1 We have developed a carbon footpring calculator and an interactive map for our customers

2 We deliver to our customers the total calculations of their carbon footprint annually

Samskip HR policy

It is Samskip's policy that all employees have the same opportunities to work within the company regardless of gender or ethnicity.

2023 - 2026

against bullying, harassment

and violence.
